

DALI CONNECT CONTROL PANEL SOFTWARE

Product Features

The DALI CONNECT Control Panel (CP) is a web-based software application that controls, tests, and monitors the entire emergency lighting installation in accordance with the requirements of EN62034.

The DALI CONNECT Control Panel communicates with both wired and wireless Ventulux DALI Controllers over the internet to provide a dynamic centralised control point.

Hosted on an AMAZON cloud, this new exciting feature offers a host of advantages over a traditional fixed centralised control panels. Reduced capital cost as there is no physical hardware for the centralise Control Panel. Dynamic mobility - the control panel can be accessed via any web interface device such as a PC, laptop, tablet or mobile phone allowing off site access and monitoring. The AMAZON cloud offers enhanced data security compared to a local network. Excellent disaster recovery with the application being mirrored on the cloud ensuring no data loss. Reduced carbon footprint with no hardware end of life issues.

A maximum of 200 DALI Controllers can be connected to the DALI CONNECT Control Panel allowing a maximum of 25,600 DALI emergency luminaires to be monitored and tested.

With the latest interactive graphics program, the user can interface with an AUTO-CAD floor plan to establish the health of their emergency lighting installation.

Site configurations can be broken down into individual building, individual floors or areas, allowing ease of site set up/commissioning and trouble free operational status and with the ability to remote monitor the site it offers further operational and environmental benefits.

The default DALI CONNECT system tests the emergency installation, daily, monthly and annually in accordance with current EN50172 legislation, custom test regimes are also available and these meet all the requirements of a PERC testing system in accordance with EN62034..

With the options for EMAIL reporting, single or multi users, AUTO-CAD graphics package – the DALI CONNECT testing systems offers a cutting edge product with the added benefit of peace of mind to the client.
